

AM Series Contractor's Kit

The AM Series Boiler/Water Heater Contractor's Kit was created with utility and convenience in mind. The Contractor's Kit contains the most commonly requested parts, packaged in a rugged, padded carrying case for easy storage and use on the job. One Contractor's Kit will service every size of AM; there is no need to carry multiple sets of parts for the same product line. This space-saving kit can be kept on a service truck and be used on every AM job site. The kit includes a bill of materials with illustrations for easy identification and kit replenishment.

The Contractor's Kit P/N 62632005 consists of:

- Control Board
- Safety Thermostat
- Flow Sensor
- Temperature Sensors
- Pressure Gauge
- Igniter
- Flame Detector
- Gas Valve
- Blower
- Fuses
- Complete Sets of Gaskets & Hardware
- Display Board
- More than 50 additional parts
