

### HYDROSKRUB

#### What is HydroSkrub?

HydroSkrub is specifically designed to dissolve the toughest water scale, lime, mud and rust deposits from virtually any piece of water-based equipment. This powerful, yet totally safe, liquid descaler is non-toxic, non-injurious, non-flammable, non-hazardous, non-corrosive and BIODEGRADABLE; so HydroSkrub will not harm your personnel, equipment or our environment!

HydroSkrub is an extremely innovative and unique solution fortified with wetting and penetrating agents to actually dissolve deposits into solution. This revolutionary liquid is time tested and proven to be the safest and most cost effective solution for fouled equipment or systems.

#### Why should you use HydroSkrub?

Equipment or systems with clean water passages operate in a designed and effective manner. Once the water-based equipment or systems become fouled with scale, lime, mud and rust deposits, efficiency decreases, energy costs increase and the useful life of equipment is diminished. Failure to address water scale problems in a timely manner runs the serious risk of costly equipment or system shutdowns, repairs, or even replacement.

#### Water deposits are a serious problem for domestic water heating applications!

Fortunately, there is a solution! Periodic HydroSkrub cleaning will dissolve these deposits into solution, restoring efficiency, conserving energy, extending the equipment's useful life and reducing the risk of costly repairs, replacement or plant downtime. Equip your plant and personnel with HydroSkrub as an integral part of your preventive or predictive maintenance program will provide you with a tool that is easy to use, efficient and safe. HydroSkrub cleaning allows equipment or systems to be cleaned without labor intensive dismantling or removal.

HydroSkrub cleaning can be performed by utilizing your own personnel, eliminating costly additional outside expenses. HydroSkrub works quickly and efficiently, with most applications completely clean in a matter of hours. HydroSkrub is safe enough to hold in your open hand, does not require any neutralizing or pacifying and is free rinsing with water. HydroSkrub has a pleasant odor and does not exude any obnoxious or toxic vapors when dissolving water scale, lime, or rust deposits.

Only HydroSkrub performs so SAFELY, SIMPLY, RAPIDLY and ECONOMICALLY!

#### HydroSkrub Works!

As you can see in the before and after photographs below, HydroSkrub works effectively and efficiently to quickly dissolve fouling scale, water scale, lime, mud and rust deposits!

BEFORE CLEANING

AFTER CLEANING

HydroSkrub is biodegradable and safe for your equipment, personnel and the environment!

## HydroSkrub IS NON-CORROSIVE

It will not erode, pit, oxidize or have other deleterious effects on metals or materials such as:

" IRON	" BRASS	" COPPER	" CERAMIC
" FIBER	" GLASS	" RUBBER	" TITANIUM
" STEEL	" NICKEL	" PLASTIC	" STAINLESS

Or other materials found in water-based equipment or systems.

## Use HydroSkrub for all AERCO water heaters

- KC1000 Gas-Fired Water Heater
- U-tube Double-Wall Water Heater
- SmartPlate Water Heaters
- Helitherm Water Heaters (SW1A+, SW1B+, B+II WaterWizard, WW3E+)

## There are many reasons to use HydroSkrub!

Now that you have learned what HydroSkrub is all about, take a few minutes to think about how and why HydroSkrub should be a part of your preventive maintenance program.

### • HydroSkrub is Effective!

It dissolves approximately 2 lbs. of lime per gallon!

### • HydroSkrub is Non-Hazardous!

It does not fall under any of the federally designated classes of hazardous waste!

### • HydroSkrub is Biodegradable!

It has a biochemical oxygen demand of 16 mg/l and can be disposed of through normal plant sewers!

### • HydroSkrub is Safe!

It can be held in the open hand without injury!

### • HydroSkrub is Economical!

Call your local AERCO sales representative to learn how an investment in HydroSkrub can multiply your efficiency!

### • HydroSkrub is Approved!

NSF/ANSI Standard 60 Listed
