

CFR[®] Cost-effective Boiler Built for Retrofits

CFR delivers the best of both worlds when replacing your boilers: reduced installation costs and greater operational savings through uptime reliability, unmatched energy efficiency and simplified installation.

Save More on Installation

Spend less time and save more money by safely reusing existing venting. Plus, its ultra-compact size means no knocking down walls.

Maximize Operational Savings

An energy-efficient boiler unmatched in its category, greater uptime reliability and a smart controller ensure operational excellence.

Ensure Peace of Mind

A durable heating solution that is backed by the industry's **only** condensate corrosion warranty and with a heat exchanger built to last you 20-30 years.

Product Summary

- Energy-efficient gas boiler
- Category I/Type B
- 1500 and 3000 MBH
- Low NOx (<20 ppm)
- Integrated Edge[®] controller
- BACNet/Modbus comms
- Industry-best warranty

A Forward-thinking Retrofit Solution

Not only does CFR save you thousands of dollars upfront in installation costs and continuously through operational efficiencies, its design and features ensure you are ready for whatever the future holds for your building.

- Highest efficiency rating among Category I boilers
- In full compliance with local energy mandates
- Smart controller for greater operational efficiency
- No economizer needed to convert to condensing system
- Easy integration of SmartPlate[®] indirect water heater

A Trailblazer in Boiler Design

In the nearly 75 years since its foundation, New York-based AERCO has consistently and continually provided innovative heating and hot water solutions for a variety of commercial markets.

CFR continues AERCO's trajectory as a trailblazer in boiler designs that ensure superior building performance at a lower operating cost and greater uptime reliability, for the local schools and restaurants as well as NFL stadiums and five-star resorts.

More Operational Savings

Less Installation Costs
