Service Bulletin 118

Firmware Update: BACnet Sensor Interface 681

A firmware update is available for the BACnet Sensor Interface 681 that improves snow detection. The firmware file J1294-field-1.1.1.hex is available on the product webpage:

681 - tekmar (watts.com)

To update the firmware, directions are as follows:

1. Download the latest version from the product webpage as designated above.
2. Copy the information onto a microSD card
    a. The MicroSD card must be 32 GB or less, SDHC types only, SDXC or SDUC types are not supported.
    b. Formatted to use FAT32 file format
3. Insert the MicroSD card into the slot on the device
4. Enter the Toolbox Menu→Select Version→ Hit Update

If you have further questions or comments, please contact tekmar technical support by email at tekmar.customerservice@wattswater.com or by phone at 1-800-438-3903.

Better Control. Better Systems.
